- (3) In Commercial and industrial districts, fences located within the buildable area for the principal structure and eight (8) feet or more from the rear lot line are exempt from any height restrictions.
- (4) In public parks, schools, or other educational facilities, public and private; fences for playgrounds, athletic fields, outdoor swimming facilities, and other similar uses are exempt from any height restrictions.

Sec. 40 - 533. Prohibited Fences.

The following fence types and locations are prohibited in the city:

- (1) Electrified fence in all districts except when containing livestock.
- (2) Barbed wire in all residential districts except when containing livestock.
- (3) Fences within a public right-of-way.
- (4) Solid concrete or masonry walls over three feet in height.

Sec. 40 - 534. Swimming pool fencing.

- (1) All outdoor pools shall be completely enclosed by a fence or wall of the nonclimbable type, so as to be impenetrable by toddlers, afford no external handholds or footholds, and be a minimum of four (4) feet in height.
 - (a) While being constructed, the pool or spa area must be fenced with a portable fence, such as a snow fence not less than four feet in height.
- (2) All outdoor fence openings or outdoor points of entry into the pool area shall be equipped with self-closing and self-latching devices. The opening between the bottom of the fence and the ground or other surface shall not be more than three (3) inches.
- (3) All outdoor special-purpose pools shall have either a fence as described in subsections (1) and (2) of this Division or a latchable cover. The cover shall be constructed of material impenetrable by toddlers and subject to inspection by city inspectors.

Sec. 40 - 535. Swimming pool fencing exception.

- (1) Swimming pools are exempt from the requirement to install a safety fence if all three of the following standards are met:
 - (a) The property upon which the swimming pool is located is zoned Agricultural, and
 - (b) The property upon which the swimming pool is located was not created through a Conditional Use Permit process allowing a lot in the Agricultural Zoning District to be smaller than five (5) acres in size, and
 - (c) The swimming pool maintains a minimum rear and side lot line setback of three hundred (300) feet.
 1. The three hundred (300) foot setback may be waived from one or all of the rear and side lot lines if a physical barrier exists (such as a lake, stream, or open water wetlands), which makes access to the swimming pool over that lot line from the adjacent property impossible or highly improbable.
