

**APPROVED MINUTES
CITY COUNCIL
WORK SESSION MEETING
CITY OF WYOMING, MINNESOTA
MARCH 15, 2016
7:00 PM**

CALL OF ROLL:

On a Call of the Roll the following members of the Wyoming City Council were present: Councilmembers Eric Peterson, Linda Nanko/Yeager, Lisa Iverson, Claire Luger and Joe Zerwas

Absent:

Also Present: Robb Linwood-Assistant City Administrator, Craig Mattson-City Administrator, Mark Erichson, City Engineer, Mark Vierling, and City Attorney

1. Pavement Management Study

City Engineer Erichson – *Asked if the city council had time to review the pavement management study and if so if they had any other questions.*

City council *asked if the ratings of the roadways could be broken down more exact ratings on sections of roadways.*

City Engineer Erichson - *explained that they have a rating for every section of roadway within the city. The amount of data this would have taken up in the report would have significant. We want to find a balance of taking care of the good streets we have with crack sealing and just overlays. Other projects will need mill and overlays and others complete reconstruction.*

The City Council and Staff discussed the current condition of 245th street and Fondant Ave. It was determined that this section of road is in extremely poor condition. The city council directed Engineer Erichson to take soil borings on the roads and to begin the process for a feasibility study for a street project this fall. This item will be an Agenda Item at the next regularly schedule city council meeting.
